subconscious, they strongly “affect what we want and whether we succeed in getting it.” Much of what we think we understand of our personality comes from our “mindset.” This both propels us and prevents us from fulfilling our potential.

Carol Dweck: A Summary of The Two Mindsets

Working at height remains one of the biggest causes of fatalities and major injuries. Common cases include falls from ladders and through fragile surfaces. ‘Work at height’ means work in any place where, if there were no precautions in place, a person could fall a distance liable to cause personal injury (for example a fall through a fragile roof).

The Centers. The Enneagram is a 3 x 3 arrangement of nine personality types in three Centers. There are three types in the Instinctive Center, three in the Feeling Center, and three in the Thinking Center, as shown below. Each Center consists of three personality types that have in common the assets and liabilities of that Center.

How The System Works – The Enneagram Institute

These leaders must work as a team with vision, skill, and sufficient resources to accomplish the organization's mission. While leadership is shared, critical management skills must rest with the chief executive. However, the board must be sufficiently skilled in management to assess the work of this director and assist in strategic decision making.
