The truth is that it's not exactly space travel. The physics at work are incredibly simple. Building an efficient car engine, a durable car engine, a clean-running car engine, that's a little more complicated. But the basics are just explosions captured in small chambers, pushing pistons to spin the rear axle.

I've never been a car guy. I just didn't have any interest in tooling around under the hood to figure out how my car works. Except for replacing my air filters or changing the oil every now and then, if I ever had a problem with my car, I'd just take it into the mechanic and when he came out to explain what was wrong, I nodded politely and pretended like I knew what he was talking about.
